Spain (ESP) - Frequencies

Submitted by the CIAM Delegate Spain on 24/01/2011

The channels whose frequencies are indicated next destine preferably to systems of control in applications of aeromodelling.

35 MHz

35,030 MHz	35,090 MHz	35,150 MHz
35,040 MHz	35,100 MHz	35,160 MHz
35,050 MHz	35,110 MHz	35,170 MHz
35,060 MHz	35,120 MHz	35,180 MHz
35,070 MHz	35,130 MHz	35,190 MHz
35,080 MHz	35,140 MHz	35,200 MHz

40 MHZ

	40,665 MHz
Ī	40,675 MHz
I	40,685 MHz
ſ	40,695 MHz

2.4 GHz

For aeromodelling applications, there is no specific rule for the use of 2.4 GHz. There is a "open window" for generic devices of low power indoor and outdoor of short-range. (The isotropic power broadcast equivalent principle will be inferior to 10 mW)
